

COMMERCIAL GREENWASTE SOLUTION

SOILIFE GROUP HAS PROVIDED COUNCILS WITH A COST REDUCING 'COMPOSTING PLAN' – USING COUNCIL WASTE FOR AGRICULTURAL & ENVIRONMENTAL BENEFIT

SoiLife Group Pty Ltd is establishing a rewarding 'Compost-Building Supply Chain', which has been approved and commended by a number of council offices - we make the links and do the hard the work for you.

SoiLife combine mulched Council greenwaste with local Farm, Stockyard & Abattoir animal waste and apply our compost building technology for an accelerated, minimal-turn ideal composted result. Application of SoiLife Compost Builder decreases conventional composting time by up to half and adds vital life & nutrients.

Composting Plan proven benefits:

- Easy Greenwaste processing solution for Council cost-reductions – no contractors, freight, landfill labour or disposal fees
- Creating waste management solutions for Farmers with animal effluent & by-product
- Opportunity for Crop and Livestock Farmers to obtain & apply bulk compost
- Widespread soil fertility increase as direct result of Council collaboration
- Increasing potential yield and profitability for Farmers
- Lifting soil carbon storage levels for possible future carbon tax offsets

We would appreciate the opportunity to discuss this plan and how it applies to your region. If required, we will submit a detailed proposal for Council's consideration.
