

Grow your own  
guaranteed delicious  
and **nutrient rich**  
**veggies & fruit!**  
Maximise your gardens  
potential to **bloom &**  
**flourish!**

## SOILIFE GROUP FOR THE URBAN GARDENER

YOUR FAMILY'S HEALTH BEGINS IN **SOIL!**

15kg pumpkins grown in Community Garden  
Treated with SoiLife Compost Builder

- *Maximise sustained plant, health & productivity*
- *Easy application to any area – measure, mix with water, apply via watering can or backpack/boom spray*
- *Increase & strengthen root development*
- *Build plant resistance to pests, disease & weather extremes*
- *Purify water systems, optimise animal health*

## OUR ECOLOGICAL FORMULATIONS MAY BE USED FOR:

- Treating your whole garden including lawns, pot plants, veggie gardens & fruit trees
- Strengthening your gardens resistance to weeds, pests and disease
- Roses, orchids & other ornamentals
- Native flora & fauna (even the birds and bees will benefit)
- Pets & livestock
- Ponds, dams and other water bodies

Orchids, Bromeliads and Macadamia trees  
treated with SoiLife Soil Builder

SOILIFE PRODUCTS PROBIOTICALLY PROMOTE THE ASSIMILATION OF NUTRIENTS, ANTIOXIDANTS, VITAMINS, MINERALS AND BIOACTIVE COMPOUNDS FROM THE HUMUS, CARBON & CLAY COMPONENTS OF SOIL TO ESTABLISH OPTIMUM PLANT GROWTH AND HEALTH.

## RESULTS YOU WILL SEE, TASTE AND FEEL

SoiLife Group is dedicated to supporting the health and sustainability of our Community, the 'Natural Environment' and Agricultural production, which all **depend on soil for survival**.

The secret to sustainable land use is to create and maintain a biologically active, living soil with a balanced, abundant and diverse population of microbes and trace minerals.

*We formulate superior ecological products to purify and rebuild life in soil, compost and water by introducing selected microorganisms in liquid form, much like human probiotics.*

## ALL OF OUR PRODUCTS

- Have been subject to research and trialing, are non-harmful, non-pathogenic, non-genetically modified and not chemically synthesized
- **Optimise assimilation of nutrients, anti-oxidants, vitamins, minerals and bioactive compounds from the soil for plant & food nutrient density**
- Are probiotic and promote balanced beneficial microbial activity that competitively excludes plant, animal and water borne pathogens, pests and disease
- Rebuild soil chemistry and structure to ameliorate soil compaction and erosion and retain moisture, nitrogen and carbon (in organic matter and humus)
- Purify salinity, balance pH and support the decomposition, assimilation and neutralization of oxidative, toxic and odour causing substances in soil and water
- Build sustained soil fertility, and reduce toxic emissions such as N<sub>2</sub>O, CO<sub>2</sub>, CH<sub>4</sub>
- Gradually reduce input costs and facilitate sustainable production
- Encourage the pursuit of fun & healthy urban gardening
